SUMMARY

Informaticist and Technology Integration Specialist who applies a data science background to turn analysis into clear, interactive dashboards for stakeholders. Skilled at bringing data, technology, and people together so systems work better. Previously spent two years in special education, using data to support students with autism and track real outcomes.

EXPERIENCE

Technology Integration Specialist 2 *Viability* — Sep 2026 to Present

- Lead the $(VR)^2$ initiative, a virtual reality pre-employment skills training program for individuals with disabilities.
- Build and manage interactive dashboards and Excel data analysis that turn results into clear reports for stakeholders.
- Administer the ArborXR device management system and manage Apple devices with Apple Business Manager and Jamf.

Special Education Autism Specialist *City of Chicopee, Chicopee, MA* — Aug 2024 to Jun 2025

- Designed behavioral interventions based on data while monitoring measurable student goals.
- Developed individualized support plans and advised educators on classroom accommodations.

Special Education Interventionist *City of Chicopee, Chicopee, MA* — Sep 2023 to Jun 2024

- Designed and implemented accommodations and instructional supports based on student data to improve outcomes.

IT Network Technician *City of Chicopee, Chicopee, MA* — Jan 2019 to Sep 2019

- Performed hardware and software troubleshooting, routing and switching, and computer imaging.
- Managed support tickets and delivered technical service directly to clients.

Data Entry Associate *Town of South Hadley, South Hadley, MA* — Jun 2015 to May 2019

- Processed daily records in MS Excel, reconciling 500+ entries to match source documents.
- Validated permit applications against the town database and flagged incomplete filings for follow-up.
- Updated resident contact lists in a SQL database system.

Community Programs and Events *City of Holyoke, Holyoke, MA* — Feb 2016 to Aug 2019, Summer 2022

- Event Associate: helped run holiday, elderly, and faculty events. Parks and Recreation: supported recreational programs, public events, and outreach.

SELECTED PROJECTS

Heart Rate from Phone Sensors Python
Filtered phone camera signals to estimate heart and breathing rate; counted steps from accelerometer data.

Developer Salary Prediction R
Linear and stepwise regression on 83,439 Stack Overflow survey responses.

Cropland by Watershed R · GIS
Measured corn and soybean area across 52 watersheds from USDA satellite crop rasters.

Social Capital in Massachusetts Python
K-means clustering of U.S. counties and regression on Massachusetts civic data.
